Installation instructions
GEALAN-SENSE® glass

GEALAN
INNOVATION MIT SYSTEM
1
Find a suitable place close to the window frame

2
Clean the previously chosen area with a cloth

3
Remove the protective film of the adhesive strip on the back
4
10 mm
Maintain a minimum distance of 10 mm from the window frame

5
Turn the battery cover clockwise and remove it

6
Insert the battery

7
Place the battery cover back in position and close it by turning it anti-clockwise

8
Immediately after attaching the sensor, press the left-hand button to generate a 30-second test

All components contained in the box
1. Glass breakage sensor
2. CR2477 battery
3. Window marking

Things to consider before installation
- If the window is larger than 2 m², please use two glass breakage sensors
- To avoid error messages, the minimum distance from the window frame should be 10 mm

Good to know!

- **Attaching the sensor**
  Before attaching the sensor, it is important to remove fine dust from the chosen area.

- **Meaning of the LEDs and sounds**
  When the battery is discharging, the red LED flashes every 10 minutes. A high-pitched tone sounds at the same time.

- **Resetting the glass breakage sensor**
  Remove the batteries, wait 20 seconds and insert them again.

- **Alarm duration**
  The alarm duration is two minutes. If the alarm needs to be deactivated before this time, this can only be done by removing the batteries.

Function key information

Recommended		
LED PRO approx. 60 sec		1x → 1x LED / 1x beep
